<sup>1</sup> EU recommendation 2003/361

The VIDA project has received funding from the European Union's Horizon 2020 research and innovation program under grant agreement n° 77779. The content of this document represents the view of the author only and is his/her sole responsibility: it cannot be considered to reflect the views of the European Commission and/or the Executive Agency for Small and Medium-sized Enterprises (EASME). The European Commission and the Agency do not accept responsibility for the use that may be made of the information it contains.

**4. To what extent has the collaborative help achieving?**

Very Low

Low

Moderate

High

Comment your answer:

Without the support, we would never have developed the product for 3D printing. This has resulted in a much higher quality result.

**5. To what extent are you satisfied because of the provided solution**

Very Low

Low

Moderate

High

Comment your answer:

We are very satisfied with the developments so far. However, we hope to continue with developments, but it all looks very promising.

**6. Would you like to purchase a technology/solution developed in the**

**VIDA innovation project in which you took part?**

Very Low

Low

Moderate

High

Comment your answer:

We certainly intend to do that once the product has been developed and demonstrated.

**7. Is there any barrier that makes it difficult to use of this technology?**

Yes

No

Comment your answer:

When there is access to expertise in designing for 3D printing, there is no barrier.
